

Secure Enterprise Computing (SEC) was founded in 1997 when Randall Bennett and Chris Harper, leaders in the technology industry, recognized a need for a company that specialized in enterprise security solutions. Since the inception of Secure Enterprise Computing, enterprise/infrastructure security has been the focus and has resulted in SEC being recognized as a leader in the area of computer security.

SEC's management and technical staff is a diverse blend of highly experienced individuals who understand both the technical and business aspects of implementing secure enterprise solutions. We have broad experience installing and implementing enterprise security systems as well as systems and information management, telecommunications and business applications.

SEC's expertise in wireless communications and security, and broad range of real world, hands on experience, has resulted in SEC being recognized by Air Defense as a reseller and assessment partner. SEC's has wireless experience in many segments of industry, with a strong focus on government, financial, and retail expertise.

SEC's assessments meet the requirements for the leading standards such as HIPPA, ISO17799, GLB, SOX, and SAS 70. SEC is also an authorized to perform PCI Compliant Assessments.

Located in Morrisville (Research Triangle Park), NC, Secure Enterprise Computing provides secure systems integration services to a wide range of local, national and international clients. SEC can be reached at 919-380-7979 or e-mail communications can be sent to info@secure-enterprise.com
